Dear Hiring Manager,

With the utmost eagerness, I want to express my interest & passion for the **SDE/Full Stack Engineer**. As a Python Backend Developer driven employee, I know my versatile skills and qualifications will make me an asset to the team.

As you will find on my resume, I have had a variety of experiences with many different technologies and programming languages in **Software Development**, from my time at **SRFusion Tech.** to my time at **Red Fibre**. I am looking to make the next step in my career by leveraging my **Software Development and Engineering skills** to make an impact on innovative projects that drive meaningful change and solve real-world problems.

As a prospective employee, I immediately can bring the following qualities to the team:

Full Stack Development: With extensive experience in full stack development, I have consistently delivered robust solutions that enhance user experience and operational efficiency. During my internship at Red Fibre, I developed a Chrome extension for fake news detection using Flask API and JavaScript. I also Contributed to Lab Inventory Management Systems with Python, Django, and SQLite; implemented admin dashboards, booking calendar, and resolved merged conflicts.

Backend Development: My career in software engineering has been marked by a strong focus on backend development and security. As a Software Development Engineer Intern at SRFusion Technologies, I was responsible for implementing authentication and authorization mechanisms using the Django REST Framework, JWT, and social-auth.

While my resume provides a quick summary of my experiences, I hope to have the opportunity to share how I can bring value to your company's needs.

Sincerely,

Devansh Upadhyay
